Subject: Call for Nominees to attend the
ExxonMobil European R&D Days 2024

Dear,

As one of the world's largest publicly traded energy providers and chemical manufacturers, ExxonMobil develops and applies next-generation technologies to help safely and responsibly meet the world's growing needs for energy and high-quality chemical products. ExxonMobil conducts cutting-edge R&D through in-house efforts of its global research organization, via partnerships with other industries, and by funding academic and other non-governmental research projects.

The ExxonMobil **European R&D Days is a yearly event** to strengthen the partnerships with the European academic research community and to provide the attendees insights into the research undertaken at ExxonMobil within the context of its commercial operations and our plans in fields such as Carbon Capture and Storage (CCS), hydrogen, advanced and mechanical recycling.

During the event, attendees can expect key note presentations from academic representatives about the research on catalysis, polymer science and advanced characterization. Moreover, we will organize tours of laboratories, pilot & manufacturing facilities, a poster event and a final symposium day. The event provides excellent opportunities for informal discussion and networking with both young employees and management representatives.

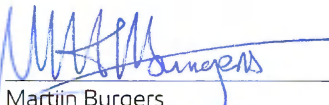

In case of interest, we kindly ask you to **nominate one late-stage PhD Student or Postdoctoral Fellow from your research group** to join us from **November 4th to 7th** at ExxonMobil's European Technology Center, located at Machelen, Belgium. We also would like to offer your work group an opportunity to provide a first-hand update to ExxonMobil researchers on your current research. Since the focus of the event is **catalysis, polymer science and advanced characterization helping to create sustainable solutions**, we strongly believe your research fits in the program. Therefore, the selected PhD/post-doctoral research member is invited to present his/her work in a non-confidential poster.

Travel, catering, and accommodation expenses will be paid by ExxonMobil. The event will take place entirely in English, so please consider language capability in selecting applicants.

The candidate is requested to send a CV via e-mail to the address provided below. **The deadline for submission is August 30th**. Please note that for practical reasons, nominations after the deadline cannot be accommodated.

We look forward to receiving your candidate's application. Successful applicants will be further contacted by e-mail. Do not hesitate to contact us should you have any question or comment.

Kind regards,

Martijn Burgers
